

HARSH TYAGI

Software Developer | React.js | Next.js

+91-8010803534 | harshtyagi8010@gmail.com | linkedin.com/in/harsh80 | github.com/HarshTyagi8010 | Ghaziabad, India

PROFESSIONAL SUMMARY

Software Developer with 1.5+ years of experience building scalable React.js and Next.js applications for high-traffic platforms including IRCTC. Proficient in REST API integration, component-driven UI architecture, and performance optimization. Passionate about delivering responsive frontend solutions for fintech and product-focused environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design

State Management: Redux / Redux Toolkit (Basic), Context API, Component State

API & Integration: REST APIs, Axios, Fetch, Async/Await, JSON, Real-time Data Handling

Tools: Git, GitHub (Branching, PRs), VS Code, Postman, GitHub Copilot

Cloud & Deployment: Vercel, AWS (EC2/S3 Basic), Serverless Deployment

Concepts: Component Architecture, Dashboard UI, Data Visualization, Performance Optimization, Cross-browser Compatibility, SDLC

PROFESSIONAL EXPERIENCE

Software Developer Trainee | BPAAS Solutions Pvt Ltd, Gurgaon | Jan 2026 – Present

- Migrating 10+ legacy JSP screens to modern component-driven UI for IRCTC Passenger Management Framework using Git branching and PR workflows, reducing technical debt by ~30%.
- Built reusable UI modules with form validation and REST API integration, cutting redundant code across 5+ modules; debugged JSON data-flow issues reducing integration defects by ~40%.

Frontend Developer | PPS International Pvt Ltd, Greater Noida | Jul 2024 – Oct 2025

- Developed responsive React.js UI for Vande Bharat / IRCTC infotainment system, integrating REST APIs for real-time JSON-based content delivery to thousands of passengers in a live environment.
- Ensured cross-browser compatibility across 5+ device configurations; collaborated with backend teams to align API contracts, reducing integration turnaround time by ~20%.

PROJECTS

Aironix Solutions Website [Live](#)

- Built and deployed a production-grade responsive website with REST API integration, dynamic JSON-driven rendering, and Docker-based deployment on Vercel serverless infrastructure.
- Engineered reusable React components with optimized state management and cross-browser compatibility, ensuring consistent performance across devices and screen sizes.

Excel Dashboard Studio [GitHub](#) | [Live Demo](#)

- Next.js analytics dashboard for Excel/CSV upload with interactive data visualization, reusable components, Context API state management, and fully responsive design.
- Optimized data parsing via memoization improving load performance by ~35%; built dynamic filtering, column mapping, and chart-type selection for fintech-grade analytics workflows.

FitYou – Fit AI Chatbot [GitHub \(Open Source\)](#) | [OSCI '25](#)

- Contributed React UI improvements to an open-source AI chatbot, reducing API response time by 20% through optimized component restructuring and efficient data flow.
- Integrated AI/LLM APIs for real-time JSON-driven contextual exercise recommendations, enhancing dynamic rendering and overall user interaction quality.

Portfolio Website [Live Demo](#)

- Built a fully responsive React portfolio with dynamic routing, REST API integration, and Docker-based Vercel deployment with Git-managed version control.
- Implemented clean component architecture with optimized rendering and seamless navigation, showcasing frontend engineering capabilities across multiple project domains.

EDUCATION

B.Tech – Computer Science & Engineering R.D. Engineering College, AKTU, Ghaziabad | 2020 – 2024

CERTIFICATIONS

AWS Academy – Cloud Practitioner | Google Cloud – Computing Foundations | Introduction to Python – Coding Ninjas
